To implement a prefecture-wide autonomous disaster prevention system, members of the association for autonomous disaster prevention and others will use this opportunity to check on the knowledge regarding prevention and on the preparation in case of disasters.

● Flexibility of the program

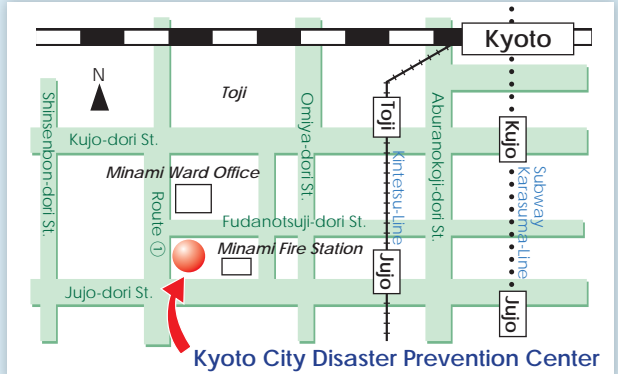

The program offered by the Kyoto City Disaster Prevention Center aims to improve the knowledge and practical preparation regarding disaster prevention of all citizens, which is why we are ready to provide flexible half-day programs with the title "Disaster prevention for citizens based on practical experience". We are looking forward to welcoming many interested participants.

- Opening hours 9am - 5pm (last reception for practical experiences is 4pm)
- Closed days Mondays (National holidays, January 17th and September 1st excepted. In case of national holiday, closure on the following day - if that day is the second Tuesday of the month closure will be postponed to the following day.)
Second Tuesday of each month (public holidays excepted)
New Year's holiday (December 28th to January 4th)
- Admission free
- Reservation Groups of more than 10 persons can make a reservation 3 months before their admission day.
* In case of Kyoto citizens group reservation may be made even 4 months in advance.
- Public access Kyoto City Bus - "Shimin Bosai Center Mae" (No. 16, 19, 42)
Kyoto City Bus - "Toji Minamimon Mae" and 8min to walk southwards
Subway - "Jujo Station" and 18min to walk westwards
Kintetsu Railway - "Jujo Station" and 8min to walk westwards

● Reservations and inquiries

Kyoto City Disaster Prevention Center TEL.075-662-1849

Address: 7 Sugata-cho, Nishikujo, Minami-ku, Kyoto 601-8445, Japan

Access by public transportation is recommended due to limited parking space.

With the newest simulators and a broad variety of experience rooms we welcome you at our facility and invite you to great learning.

4F

Lecture Room

2F

- 1 Fire Extinguishing Experience
- 2 Evacuation Behavior Experience
- 3 Emergency Report Experience
- 4 Overall Disaster Learning
(The room is connected to the 3rd floor.)
- 5 "Safe-Living" Learning

Great programs on each floor !

We offer opportunities to make various experiences. Children will also enjoy learning disaster prevention / evacuation.

We offer only one time for each program per person. In addition, please refrain from eating and drinking inside the building (except the space around vending machines). Thank you for your understanding.

Visual Experience 1F

Experience different kinds of disasters in Kyoto in past with a high definition (HD) cinema. (20min)

Storm Experience 1F

Fighting against wind as fast as 32m per hour makes any action difficult - as you will learn in this room. (20min)

Children Fire Fighters on Demand!! 3F

Put out all little flames setting your home on fire!

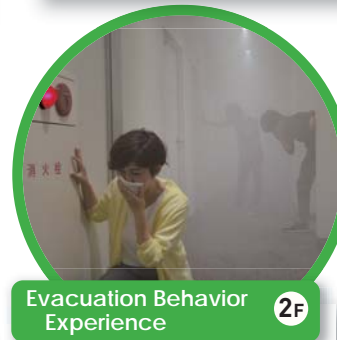

Become a Fire Fighter! 3F

Posing in front of the monitor, you can become various fire fighters!

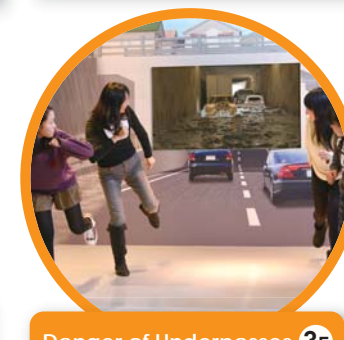

Earthquake Experience 1F

Earthquakes in the scale of 4 to 7 in magnitude make not only yourself but also your interior shake! (20min)

Evacuation Behavior Experience 2F

Here you can experience a realistic fire accident in an hotel so you can practice how to effectively escape through smoke. (20min)

Danger of Underpasses 3F

The underpass gets flooded... Get out of your car and escape! Will you be able to keep calm ?

Disaster Prevention Game 3F
- The Brave Fire Fighters -

Based on 3D and CG technology you are able to experience realistic flames and floods as well as earthquakes and how to handle them!

Fire Extinguishing Experience 2F

Learn how to correctly use fire extinguishers to put out flames that are shown on a monitor. (20 to 30min)

4D Cinema: The Narrowing Basement 3F

Experience disasters caused by water and how to handle them in this 4D cinema (3D movie and shaking seats) simulating a flooded basement. (20min)

Landslide Disaster Experience 3F

In the landslide disaster learning section, you will learn about the dangers and mechanisms of landslide disasters, and at the Real Theater, you will experience the state of the landslide disaster with powerful images. (20min)

Overall Disaster Learning 2F

In order to improve the knowledge of disaster prevention and how to actually handle with disasters we provide a training program containing how to operate automatic disaster alarm systems and much more.
